There does not have to be actual EPA employee coverage during all business hours during the week – just coverage during business hours during the week so if anyone stops by there is someone available – that could be START – If your name is designated for the week – it will be your responsibility to work it out with START as to who is covering what days and when there will be overlap – just make sure someone (EPA and/or START) is working the site during normal business hours.

Looks like Nov. Should be covered already, just need Dan/Matt confirm for week of 10/17.

If we do begin to shift to a part time scenario for site coverage, I would be able to do spot checks when covering WashCo.

I think I sent this out before. I have phone duty the week of the 10th and R1 duty the week of the 24th. Like you mentioned, we have the level A exercise the week of the 16th.

The only week I'm available in November is the week of the 3rd. I actually already put in a TAR for that week.

I don't care either way. I know the plan is to bring the ECAM to the site the week of October 27th. I have a TA to go down part of the week to help get that calibrated and communicating. I don't expect it will take all week. You just let me know if you want me to cancel my TA for the week of November 3rd.

Here is the draft calendar so far for November – few thoughts – James and I have the first two weeks covered (Manuel and Tom let me know if your itching to go the first week of November as I would gladly stay here to bow hunt). We have mandatory training the third week November for OSCs so we will need Dan or Matt to cover the week of the 17th. Thanksgiving is the last week of November so it doesn't make much sense for an OSC to go over from KC for three days if Adam can cover from St. Louis. Dan and Matt please respond about the week of the 17th. Adam please respond for the week of the 24th.
